

# Pioneering a world of open payments

Founded in 2008, Trustly is a global leader in online banking payments. Our digital account-to-account platform redefines payment speed, simplicity and security by linking some of the world's most prominent merchants direct to consumers.

What makes Trustly different is that we handle the whole payment journey, enabling us to offer an attractive, lower cost alternative to traditional card networks.

With more than 500 employees across Europe, North America and Latin America, Trustly is a licensed Payment Institution under the second payment services directive (PSD2). We operate in Europe under the supervision of the Swedish Financial Supervisory Authority. In the US, we are state regulated as required to serve our target markets.

Trustly serves 8,100 merchants, connecting them with more than half a billion consumers and over 6,000 banks in over 30 countries. In 2020 we processed over \$21 billion in transaction volume through our global network.

countries

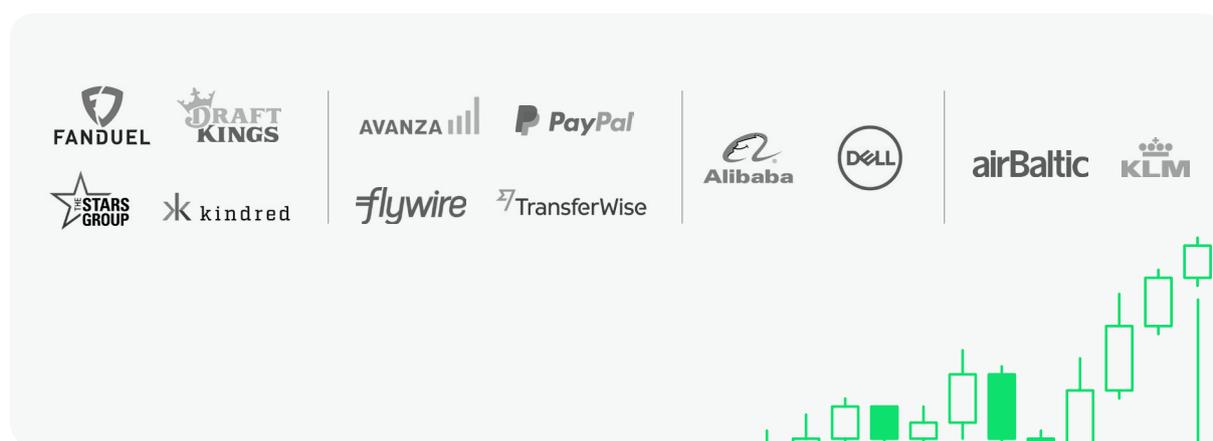

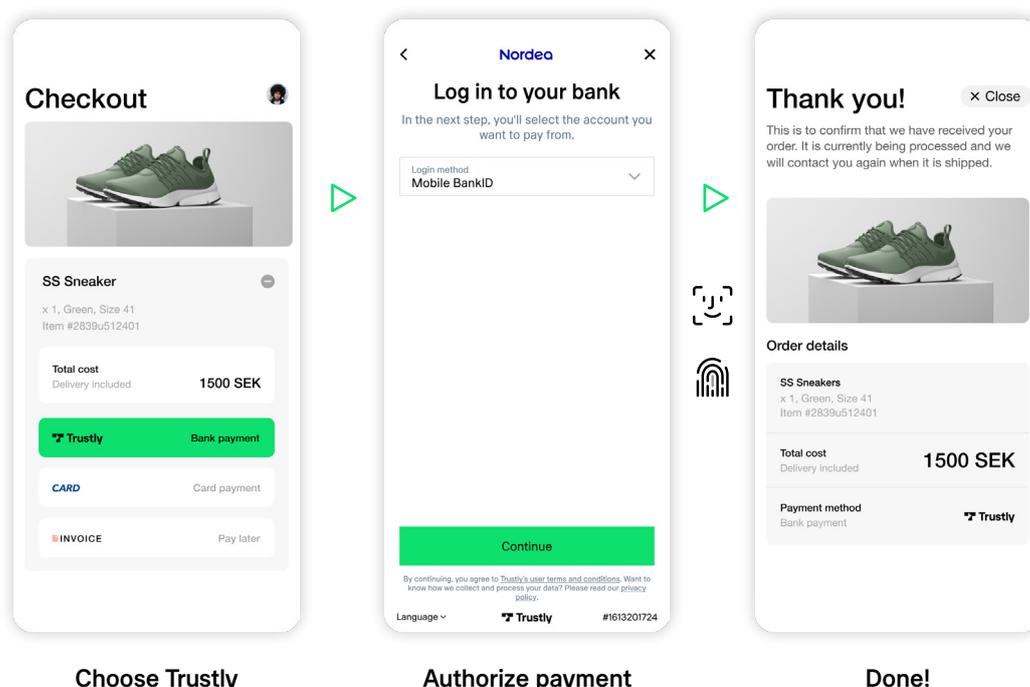

# Product description

Trustly bypasses the complex traditional payments ecosystem, cutting friction and fees for merchants and consumers alike.

Our core products are pay-ins, pay-outs and recurring payments. We also offer value-added services such as identity information, bank information and merchant services.

We are enabling the shift to cardless societies by providing immediate payments, clarity and transparency to consumers in a sustainable and responsible manner.

With no app, no new passwords and no new enrollments, we offer people a superior way to pay and get paid.

# Verticals Served

Though Trustly's roots are in gaming, we have since grown to include the Financial Services, E-commerce, and Travel verticals, all of which will benefit strongly from the shift to account-to-account payments.

## Financial Services

Providing clients a premium experience with speedy deposits and payouts.

## iGaming

Let players get in the game with swift deposits and rapid access to winnings.

## E-Commerce

Delighting shoppers with seamless payments and quicker refunds.

## Travel

Open the door to new experiences and speed up your payment settlement.

With Trustly, consumers pay with money already in their bank account. Debit payments are a more sustainable way to pay which doesn't contribute to increased consumer debt.

**“The most sustainable payment alternative available,”**

Johan Tjärnberg, CEO
